

100,000 square-foot API/ISO registered facilities built on 15 acres.

# MASTER RIG INTERNATIONAL

We proudly serve our customers with the best technical and experienced personnel available in the marketplace today. At Master Rig International we have assembled a prestigious team of skilled and experienced individuals to provide the best and fastest service for all your equipment needs. Our services include in-shop repair and refurbishment, worldwide field services, media blast and coating, capital equipment and parts sales. These services allow us to deliver a quality, reliable product each and every time.

Founded in 2005, Master Rig International operates on 15 acres with over 100,000 square feet with 450 tons of combined crane served shop. Our priority is to help our customers redeem their time. Whether you need parts, field or in-house service, repair/refurbishment, equipment packaging, technical services, fabrication, or media blasting and coating, Master Rig International is your single source solution.

# OUR SERVICES

## SERVICES & REPAIR

We are a proven and experienced supplier of repair, refurbishment and recertification services for all types of equipment. We meet the most stringent tolerances ensuring equipment runs at maximum capacity and peak output.

## ELECTRICAL

Equipment testing, generator controls, consoles, elevation systems, inspections & project management. Build or rebuild power house or basic skids for drawworks or mud pumps, no job too big or small!

## FIELD SERVICES

We provide worldwide onsite equipment reconditioning, repair, preventative maintenance and inspections to minimize downtime and maximize the lifetime of existing equipment. Our field service technicians holds all necessary certifications and qualifications.

## TEARDOWN & INSPECTION

Our equipment inspection services detect defects and discontinuities before they cause serious damage, assuring smooth operation and reducing financial risks.

## FABRICATION

Industrial fabrication services which include cutting, forming, welding, sawing and more, are all utilized at Master Rig International. This provides our customers with the total ability to centralize their fabrication requirements.

## TOP DRIVE

Our top drive dynamometer allows full load testing of all makes and models of AC/DC and hydraulic systems up to 2,000 hp and generates real time data for customers.

# OUR SERVICES

## WIND ENERGY

Master Rig International offers global wind turbine gearbox repair services, spare-parts availability for field services, bearing replacement, and exchange gear units.

## BLAST & COAT

MRI specializes in blasting and coating varying complexities of shapes and sizes. Our facility is designed to meet specific customer needs related to all industries and specifications.

## PIPE HANDLING

Master Rig International has extensive experience rebuilding and recertifying iron roughnecks. With regular and proper maintenance, you can be assured your equipment will operate safely and reliably for years to come.

## HYDRAULICS

We offer hydraulic cylinder remanufacturing and exchange programs to meet or exceed OEM specifications for all markets and all types of equipment. Industrial chrome plating, laser cladding, and friction welding are available.

## BEARING REPLACEMENTS

Trust us to replace or repair bearings from all manufacturers. A typical bearing repair can save you between 25-75% of the cost of a new bearing.

## GEARBOX

We inspect, repair, rebuild and recondition all types of gearboxes. We have the technical ability to not only offer repairs on multi-brand gearboxes and rotor shafts, but we also offer repairs on auxiliary equipment.

# QHSE

**Quality, Safety, Health and Environment** are first-tier priorities at Master Rig International. We take pride in our work and continually strive to improve.
